Taper file recommendations

The saw file edge is set to give a correct fit in the gullet of the saw tooth. The following table will assist you in choosing the right file for each pitch of saw tooth.

Teeth per inch	Recommended file	Teeth per inch	Recommended file
16	Double extra slim—4in.	9	Extra slim—6in.
13/14	Extra slim—4in.	8	Extra slim—7in.; or Slim—6in.
12	**Extra slim—5in.**	7	Slim—6in. or 7in.
11	Regular—4in.; or Extra slim—5in.	6	Regular—6in.; or Slim—7in.
10	Extra slim—6in. or 5in.	5	Regular—7in.

Taper (triangular) saw files are for filing saws with 60° angle teeth.

Tape/regular 60° angle, triangular section for filing saw teeth. Single cut on edges and flat sides. Equal sides tapering towards point.

Length	4in.	5in.	6in.
Section	$1\frac{1}{32}$	$1\frac{3}{32}$	$1\frac{5}{32}$
Length	7in.	8in.	10in.
Section	$1\frac{7}{32}$	$1\frac{9}{32}$	$2\frac{3}{32}$
